SUMMARY:
>   Full stack developer with the practical knowledge front-end and back-end development

TECHNICAL SKILLS:
- Frontend : ReactJS , Javascript, HTML, CSS, Tailwind
- Backend : NodeJS, ExpressJS
- Database : MongoDB,PostgreSQL
- Tools   : Git & GitHub, REST APIs, Leaflet.js

PROJECTS:

Eco-Eye:
- Developed my first Original full stack web app to report garbage using image capture and real-time geolocation.
- Built the frontend using **React.js** and **JavaScript** to create an interactive and user-friendly interface.
- Implemented backend with **Node.js** and **MongoDB** to store user reports with images, coordinates, and timestamps.
- Designed an admin dashboard using **Leaflet.js** to visualize reports on a map with live routing support.

Movie Platform
Created a dynamic movie information platform using the MERN stack that fetches data from a third-party movie API.

- Used React.js to develop a user-friendly interface that displays movie listings, search, and detail views.
- Integrated Express and Node.js to manage API requests and route data.
- Utilized MongoDB to save user preferences and watchlists.
- Implemented responsive design and loading states for smooth UX.
-

Resume:

- Built a personal resume website using **React.js** and **JavaScript** to showcase skills, projects, and experience interactively.
- Designed a responsive layout with **HTML5** and **CSS3** for optimal viewing on desktop and mobile devices.

EDUCATION: Currently a 4th year BSC.CSIT student in Amrit Science Campus.
